🏠 Mumbai, Maharashtra – 400078

Professional Summary

Full Stack Software Developer with 6+ years of experience building scalable, high-performance enterprise applications. Skilled in full-stack development using .NET Core, ASP.NET MVC, C#, and Angular, with expertise in building robust backend systems and responsive front-end interfaces. Proficient in SQL Server, Oracle, PostgreSQL, and MySQL, with strong capabilities in data modelling and performance tuning. Experienced in micro services, API integration, and CI/CD pipelines for efficient, secure deployments.

Technical Skills

Languages: C#, Golang , SQL, JavaScript, TypeScript.

Frameworks & Libraries: .NET 8, .NET Core , MVC Core, Gin, Beego, Angular 16+ , Clean Architecture.

Databases: SQL server (2014/2016), MySQL, PostgreSQL.

Web Technologies: Angular Material , RxJS , HTML5, CSS3, Bootstrap, AJAX, jQuery, Kendo UI, Concurrency (Goroutines, Channels).

DevOps & Tools: Git, SVN, Docker, AWS, Visual Studio, VS Code.

Areas of Expertise: Full-Stack Development, Micro services, API Development, Database Optimization, CI/CD, Docker, Kubernetes.

Technical Skills Summary

Backend & Programming Languages

- Deep expertise in **C#**, used across nearly **6 + years** of enterprise application development
- Solid background in **Golang**, building performant APIs and **micro services** for **3+ years**
- Practical experience with **JavaScript**, **TypeScript**, and **SQL** in full-stack environments

Frameworks & Architectural Patterns

- Extensive experience with **.NET Core (4+ years)** and **ASP.NET MVC (over 3+ years)**
- Worked with **Angular (v08 –16+)** for approximately **3.5 years** across multiple SPAs
- Familiar with **Gin** and **Beego**, leveraging them for Go-based service architecture for **2.5+ years**
- Strong command of Clean Architecture and separation-of-concerns design principles

Databases

- Advanced use of **SQL Server** for 4 years in transactional systems
- Over 1 year of hands-on experience with **PostgreSQL** in high-load environments
- Exposure to **MySQL** for around 10 months, supporting analytics and reporting modules

Front-End & UI Development

- Developed dynamic, responsive UIs using Angular Material, RxJS, Bootstrap, HTML5, CSS3
- Hands-on experience with jQuery, AJAX, and Kendo UI in both legacy and modern projects

Cloud, DevOps & CI/CD

- Delivered cloud-native applications using **AWS ECS, EC2**, and Code Pipeline over **3 years**
- Proficient with **Docker, Kubernetes**, and infrastructure automation tools
- Built automated pipelines using **GitHub** Actions, and managed code control via Git, SVN

Specializations & Strengths

- **RESTful** API design, distributed **micro services**, event-driven systems
- Concurrency control using **Go routines and Channels** in production services
- CI/CD automation, scalable deployments, and Agile delivery methodologies

Key Achievement

First Rating Award (2024–2025) : Received the First Rating Award for outstanding technical contributions at ICICI Lombard.

Work Experience

ICICI Lombard Pvt Ltd via Pinnacle Technologies until Apr 2024

Mumbai, India

07/2022 – Present

Role: Full Stack Developer

Tech Stack: .NET 8, .NET Core, Angular 16, Golang (Gin), PostgreSQL, REST APIs, Docker, GitHub, AWS(ECS, EC2), HTML5, CSS3, RxJS, Angular Material

ICICI Lombard General Insurance specializes in health, motor, home, travel, and business insurance, leveraging technology for efficient service delivery.

- Led the end-to-end development of the **Fleet Management System (FMS)**, a scalable platform for managing bulk fleet insurance, reducing claim processing time by 30% and improving operational throughput.
- Designed and optimized relational database schemas and SQL queries, achieving a 15% reduction in database load and improving data retrieval speed.
- Migrated enterprise databases from Oracle to PostgreSQL, reducing licensing costs and improving system performance and scalability.
- Resolved critical production incidents, boosting application uptime and improving customer satisfaction scores by 25%.
- Integrated real-time vehicle tracking and automated maintenance scheduling, driving a 20% increase in fleet operation efficiency.
- Developed robust CI/CD pipelines using Jenkins and Github, automating deployment workflows and shortening release cycles by 30%.
- Engineered and maintained **RESTful APIs** for seamless integration with third-party applications and internal services, enhancing data flow and system interoperability.

- Contributed to multiple key modules, including **Extended Warranty**, **SCPA**, and **Fleet Management System**.
- Supported the development of mission-critical applications, such as **Nysa**, **Nysa-Banca**, **Rio**, and the **Plutus Payment Platform**, used across core business functions.

P-Mech Technologies Pvt Ltd

Mumbai, India

09/2021 – 07/2022

Role: Full Stack Developer

Tech Stack: .NET Core, Angular 11, SQL Server, Bootstrap, REST APIs, HTML5, CSS3

Developed PMT Tank Software, a tool for designing and verifying storage tanks compliant with API 650 standards.

- Designed and deployed a full-stack web application, ensuring 100% integration between front-end and back-end systems, and reducing user error rate by 40% through optimized user experience design.
- Engineered database schemas to manage large-scale data for tank components, improving query performance by 15%.
- Built APIs to streamline data exchange between front-end and back-end systems, reducing processing time by 20%.
- Collaborated with engineers to ensure calculations adhered to **API 650** standards and safety protocols.
- Created responsive designs to optimize user experience across various devices, increasing user adoption rates by 25%

Preventine Life Care Pvt Ltd

Mumbai, India

02/2021 – 09/2021

Role: Software Developer

Tech Stack: C#, ASP.NET MVC, SQL Server, Kendo UI, jQuery, AJAX

Preventine Life Care is a leading genetics laboratory offering screening and predictive testing services.

- Built core functionalities for the **UTICA** and **PLIMS** systems, enabling real-time tracking and automated reporting of genetic samples, leading to a 50% improvement in sample processing speed and accuracy
- Designed secure and scalable database structures, maintaining 100% data integrity.
- Programmed core business logic in **C#** to automate workflows, cutting manual tasks by 30%.
- Improved interface responsiveness using **AJAX** and **jQuery**, reducing load times by 20%.

Zior Info Tech Pvt Ltd

Delhi, India

08/2019 – 11/2020

Role: Software Developer

Tech Stack: .NET Framework, C#, MVC, SQL Server, HTML/CSS, Bootstrap, jQuery

Zior Info Tech develops software solutions for healthcare, insurance, and associations.

- Delivered tailored, scalable applications that enhanced operational efficiency for healthcare and insurance clients by 15%.
- Led the end-to-end delivery of bespoke systems for international clients, managing a team of 10+ developers, ensuring reliability and regulatory compliance, and increasing client satisfaction by 20%.
- Maintained secure and scalable platforms supporting diverse healthcare and insurance client needs, improving platform security by 40% through regular updates and security protocols.

Education

Master of Computer Applications (MCA)

Integral University, Lucknow — 2018

Focus: Software Engineering, Database Management, Web Technologies

Master of Science (M.Sc.) in Computer Science

Integral University, Lucknow — 2016

Focus: Programming, Algorithms, Computer Networks

Post-Graduate Diploma in Computer Applications (PGDCA)

Shobhit University, Meerut — 2015

Focus: Application Development, Operating Systems, IT Fundamentals

Declaration

I do hereby declare that the above given statements are true and correct to the best of my knowledge.
